PROFESSIONAL SUMMARY

Web Developer and Web Designer with hands-on experience designing and developing responsive websites using HTML, CSS, JavaScript, Webflow, and Figma. Able to handle both the design and development side of website projects, from Figma layout planning to front-end implementation, Webflow builds, CMS setup, contact forms, animations, client feedback revisions, and mobile-responsive delivery.

Experienced in paid client projects, student client systems, remote project-based work, WordPress Elementor support, and commercial-ready portfolio websites. Currently improving Tailwind CSS, React, TypeScript, and Node.js while building toward full-stack web development.

CORE SKILLS

Web Development	HTML, CSS, JavaScript, PHP, Responsive Website Development, Front-End Development
Web Design	Figma, UI Layout Design, Website Wireframing, Visual Design, Brand-Focused Layouts, Responsive Design
Webflow / CMS	Webflow Development, Webflow CMS, Contact Forms, Responsive Webflow Layouts, WordPress Elementor, WordPress CMS Management
Mobile / App Dev	Kotlin, Jetpack Compose, Room Database, SharedPreferences, Local App Development
Currently Improving	React, TypeScript, Node.js, Tailwind CSS, Full-Stack Web Development
Professional Strengths	Problem-Solving, Remote Work, Client Feedback Handling, Independent Work, Detail-Oriented Execution, Adaptability

CLIENT & PROJECT-BASED WORK

Southlight — Paid Freelance Client Webflow Portfolio

Role: Web Designer & Webflow Developer | Tools: Figma, Webflow, Webflow CMS, Responsive Design

Designed and developed a paid Webflow portfolio website for a freelance creative professional offering photography, videography, branding, drone shots, image editing, and video editing services.

- Created Southlight's first online portfolio presence with a hero section, gallery grid, about section, services, package/pricing section, working inquiry form, footer, and social links.
- Designed the layout in Figma, presented it to the client, revised the visual direction based on feedback, then developed the approved version in Webflow.
- Implemented Webflow CMS for portfolio images and built a fully responsive layout across desktop, tablet, and mobile.
- Handled a complex visual grid, high-quality video presentation, and minimalist design direction while keeping the website smooth and client-ready.

StudentFlow — Paid Student Client Mobile Application

Role: Mobile App Designer & Developer | Tools: Figma, Kotlin, Jetpack Compose, Room Database, SharedPreferences

Designed and developed a local student task management mobile app used for a school requirement presentation and approved by the client.

- Designed all app screens in Figma and developed the approved interface using Kotlin and Jetpack Compose.
- Built task management features allowing users to add, view, edit, delete, schedule, complete, and track pending tasks.
- Integrated Room Database for local storage, alarm and notification features for reminders, local account creation/login/profile/logout flow, and dark mode using SharedPreferences.
- Solved implementation challenges involving Room Database integration and alarm/notification functionality.

Student Management System — Paid Student Client Web System

Role: Web System Designer & Developer | Tools: HTML, CSS, PHP, MySQL, XAMPP

Developed a web-based student management system for a school requirement presentation, focused on admin access and student record management through a dashboard interface.

- Designed the system interface independently based on client requirements.
- Built admin account creation, login access, student add/edit/update/delete features, student list viewing, and filtering by course and year level.
- Connected the system to a MySQL database using XAMPP and handled backend challenges including database connection, CRUD operations, data handling, and filter functionality.

COMMERCIAL-READY WEBSITE PROJECTS

Nova — SaaS Website

Tools: Figma, HTML, CSS, JavaScript

- Designed in Figma and developed a responsive SaaS-style website with hero section, dashboard preview, features, pricing, testimonials, CTA areas, navigation, and footer.
- Added JavaScript interactions including mobile menu, scroll animations, button interactions, pricing toggle, FAQ dropdown, carousel/slider, and modal popup.
- Demonstrates modern SaaS landing page design, dashboard-style UI, clean visual hierarchy, polished animations, and responsive delivery.

Brew & Bond — Cafe Website

Tools: Figma, HTML, CSS, JavaScript

- Designed and developed a responsive cafe website with hero section, promo bar, navigation, brand value cards, customer favorites, product cards, branch CTA, footer, and social links.
- Added mobile navigation, product “View More” buttons, animations, scroll effects, modal popup, and menu filtering to create a realistic cafe brand experience.

DesignSpaces — Real Estate Website

Tools: Figma, HTML, CSS, JavaScript

- Designed and developed a responsive real estate website with property search hero, statistics, featured listings, property cards, process/service section, testimonials, CTA, and footer.
- Added property search/filter functionality, mobile menu, animations, scroll effects, property card interactions, and modal popup behavior.

Photographer Portfolio — Portfolio Website

Tools: Figma, HTML, CSS, JavaScript

- Designed and developed a responsive photographer portfolio with bold hero section, featured project gallery, CTA, social links, footer, and image-focused layout.
- Added mobile navigation, image hover effects, gallery interactions, animations, scroll effects, filtering, modal/lightbox preview, and contact button behavior.

Skin Health — Beauty Landing Page Design Concept

Tools: Figma

- Created an early skincare landing page concept in Figma focused on hero section layout, clean visual presentation, product-focused styling, and beauty brand direction.

PROFESSIONAL EXPERIENCE

Freelance Web Developer / Project-Based Website Developer

Remote / Project-Based | Mid 2024 – Mid 2025

- Worked remotely on paid project-based web development tasks, student client projects, Webflow websites, commercial-ready portfolio builds, and smaller website/portfolio revision tasks for local freelancers.
- Handled end-to-end website work including Figma design, layout planning, HTML/CSS/JavaScript development, Webflow development, responsive design, CMS setup, contact forms, animations, revisions, and portfolio improvements.
- Interpreted instructions from chat messages, screenshots, reference websites, Figma designs, video calls, and direct feedback.
- Completed smaller paid tasks such as layout fixes, content updates, spacing adjustments, responsive improvements, section changes, page additions, button/link updates, and portfolio design revisions.
- Handled challenges such as matching reference websites, adapting layouts based on changing requirements, and applying revisions until the expected visual direction was reached.

WordPress Elementor Website Developer Apprentice

Freelancer-Guided Apprenticeship | 2023 – 2024

- Supported a freelance web developer with WordPress Elementor updates across business websites, service websites, e-commerce pages, company websites, and forum-style websites.
- Updated content, images, buttons, links, and sections; fixed spacing, alignment, and layout issues; adjusted mobile layouts; edited product pages; and improved page presentation.
- Added small HTML/CSS code snippets inside WordPress when needed and improved practical experience with Elementor workflow, WordPress CMS management, and responsive maintenance.

EDUCATION & SELF-DIRECTED LEARNING

Central Mindanao University — Bachelor of Science in Information Technology, Undergraduate Coursework up to 2nd Year | 2022 – 2024

Studied core IT topics including web development, programming, database systems, mobile app development, UI design, software development, networking, systems analysis, and Python.

Self-Directed Web Development & Design Learning | 2023 – Present

Continuously improving skills in web development, web design, responsive design, Webflow development, JavaScript, UI layout design, and modern website building. Currently improving Tailwind CSS, React, TypeScript, and Node.js while building toward full-stack web development.

PROFESSIONAL PROFILE

Problem-solver, adaptable, and detail-oriented Web Developer and Web Designer with the ability to handle both design and development. Comfortable working remotely and independently, following client instructions, applying feedback, improving layouts, and building responsive websites with clean presentation and strong user experience.
