PROFESSIONAL SUMMARY

Web Developer and Webflow Developer focused on designing and building professional websites for brands, businesses, and individuals. I create modern, responsive, and maintainable websites that help clients present their business clearly, build credibility, and create a stronger online presence.

CORE SKILLS

Web Design Figma, Responsive Design, UI Layout Design	Webflow Development Webflow Development, Webflow CMS, Website Maintenance
Front-End Development HTML, CSS, JavaScript, Tailwind CSS	Additional Tools & Technologies Basic Framer, Basic WordPress Elementor, PHP, Basic MySQL, Kotlin, Jetpack Compose

CLIENT PROJECTS

Southlight - Freelance Client Webflow Portfolio

Designed and developed a Webflow portfolio website for a freelance client, focused on presenting creative work through a clean layout, structured project sections, and a polished visual experience.

StudentFlow - Student Client Mobile Application

Built a fully functional student-focused mobile application for a student client using Kotlin and Jetpack Compose. Developed account-based login, alarm and notification features, assigned task management, CRUD profile functionality, logout flow, and dark mode support.

Student Management System - Student Client Web System

Developed a web-based student management system for a student client using HTML, CSS, PHP, MySQL, and XAMPP. Built admin login, multiple admin access, dashboard interface, student record viewing, database storage, and full student record management including adding, editing, and deleting student data.

COMMERCIAL-READY WEBSITE PROJECTS

Nova - SaaS Website

Built a commercial-ready SaaS-style website with a dashboard-inspired interface, responsive sections, clean visual hierarchy, and polished structure for product storytelling.

DesignSpaces - Real Estate Website

Built a commercial-ready real estate website focused on property browsing, responsive card layouts, clear section structure, and a simple path for user inquiries.

Skin Health - Beauty Landing Page

Designed a commercial-ready beauty landing page focused on product trust, benefit-led sections, simple navigation, and polished skincare-related presentation.

Brew & Bond - Cafe Website

Created a commercial-ready responsive cafe website with clean navigation, brand-focused sections, and a warm visual direction for presenting menu and business information clearly.

Photographer Portfolio - Portfolio Website

Developed a commercial-ready photography portfolio website with image-focused presentation, clean gallery layout, and a strong visual browsing experience.

PROFESSIONAL EXPERIENCE

WordPress Elementor Website Developer Apprentice

2023 - 2024

Assisted in polishing and maintaining WordPress Elementor websites by updating content, fixing layout issues, removing outdated sections, and improving the overall presentation of website pages.

- Assisted in polishing and improving website layouts.
- Updated, removed, and changed website content based on project needs.
- Fixed minor website issues and layout inconsistencies.
- Helped improve the overall presentation of WordPress Elementor websites.

Freelance Web Developer / Project-Based Website Developer

Mid 2024 - Mid 2025

Handled project-based website development and design work, including Webflow development, responsive website layouts, and collaboration with local freelancers on selected projects such as Southlight Studio. Focused on creating clean, professional, and client-ready websites based on project needs.

- Designed and developed websites using Webflow and modern web design practices.
- Worked on project-based website tasks for freelance and local project opportunities.
- Built and refined website layouts based on project requirements.
- Assisted in creating professional, responsive, and client-ready website pages.
- Collaborated with local freelancers on selected website projects.

EDUCATION

Central Mindanao University

Bachelor of Science in Information Technology - Undergraduate Coursework | 2022 - 2024

Studied core areas of information technology, including web development, programming fundamentals, database systems, and application development.

TRAINING / SELF-DIRECTED LEARNING

Self-Directed Web Development & Design Learning

2023 - Present

Continuously improving skills in web development, web design, Webflow development, responsive design, HTML, CSS, JavaScript, Tailwind CSS, and modern website building. Currently expanding knowledge in React, Node.js, and full-stack development through online learning, documentation, and hands-on project practice.

STRENGTHS / PROFESSIONAL QUALITIES

Detail-oriented and client-focused developer who is willing to learn, adaptable to project needs, and open to feedback and revisions. Focused on improving work quality, understanding client goals, and delivering clean, professional, and maintainable website solutions.
